

Job Description

Analytics Manager

Position Summary

The role will help drive financial analysis and management reporting to help shape the direction of the company. This will involve ad-hoc projects and analysis as well as regular analysis of financial and operational data and preparing management presentations monitoring all aspects of the business. It will involve some oversight of other team members as well as analytic work. The team is service-oriented and interfaces with all aspects of the organization. It requires strong analytical and quantitative skills.

Permanent Essential Duties and Responsibilities

- Works closely with business to understand and document decision support needs.
- Independently identifies areas to improve business from programmatic, clinical, and data perspectives.
- Leads discovery activities with business and information services staff at all levels to understand business objectives, assumptions and constraints related to a solution delivery.
- Works with technical staff to design/develop business intelligence application, data models and data movement processes.
- Works with project team and management to identify and document benefits, costs and risks associated with solution alternatives.
- Performs risk assessment.
- Communicates status issues and changes to appropriate audience.

Requirements

- Master's of Public Health or Public Policy or comparable
- 2-4 years Health Care background
- **MUST HAVE Medical claims experience, experience with ICD9 / CPT / HCPCS**
- Reporting experience
- Strong analytical, quantitative, problem solving, and organizational skills; attention to detail; and ability to coordinate multiple tasks, set priorities, and meet deadlines.
- Seek a team oriented, self-starter who can work effectively overseeing others as well as contributing as a member of a team or independently as the particular assignment requires.
- Excellent interpersonal skills, ability to build strong relationships with internal clients, and a successful track record of collaboration toward achieving objectives expected.
- Demonstrated analytical and computer proficiency
- SAS experience desired
- SQL experience desired
- Actuarial or epidemiology experience required
- Enthusiasm for working for a company with a mission of helping those in need
